Konica Minolta Products

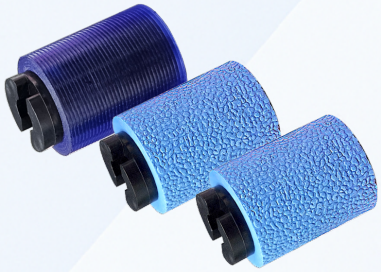

[Sr-C16] RADF feed roller set
A set of embossed feed rollers with excellent friction. The first and second feed rollers are made of embossed material that pulls paper well, while the reverse feed roller offers excellent durability.

[Si-055] Resist Cleaning Sponge
A product to replace the registry cleaning sponge when it becomes worn out and no longer functions properly.

[Si-054] RADF sheet sponge
A replacement product when the RADF sheet sponge is worn out and does not adhere well, causing it to fall off.

[Sr-C15] Embossing cassette feed roller
The embossing cassette feed roller has deep embossing on the surface, which is excellent for paper care and has excellent friction to pull the paper well.

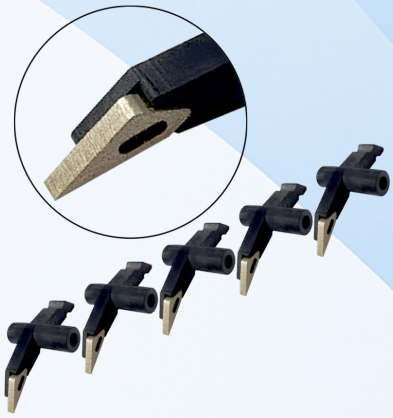

[Sr-C19] Cassette feed roller set (DB roller)
Premium feed rollers with excellent durability. The primary and secondary feed rollers are embossed rollers for optimal paper pickup, and the reverse roller is highly durable.

[Si-037] Cassette snap ring improvement
Snap ring required to secure the cassette feed roller.

[Sf-003] Fixture gear improvement
Made of solid material for durability and equipped with bearings on the inner diameter for smooth gear rotation

[Sf-005] Fixture heater roller finger
The end is made of iron and has been improved into a durable product that can be used semi-permanently by replacing it once.

[Sf-006] Fixture press roller finger
An improved product that can be used semi-permanently by replacing the fingertips once by making the ends of the fingers out of a hard material.

[Sr-C04F] Cassette feeder full set
A complete paper feed set for a single cassette. The primary feeder uses a serrated edge to effectively pull the paper, the secondary feeder uses a roller with holes to prevent misfeeding, and the reverse feeder uses a durable urethane roller for long-term use.

[Sr-H03] Manual feed roller
The embossed material with deep protrusions on the surface pulls the paper well, so there is no misfeeding and the paper is pulled well.

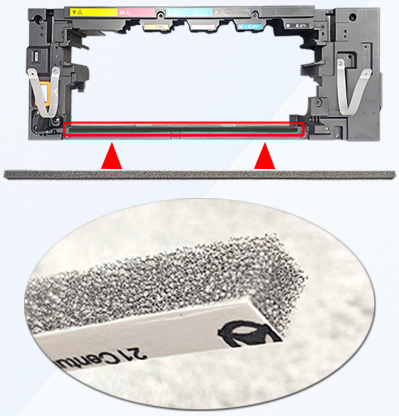

[Si-027s] Cassette handle lock, rail improvement set
A roll is inserted into the cassette lock to make inserting and removing the cassette smooth, and an improved rail is installed to eliminate play in the cassette and prevent damage.

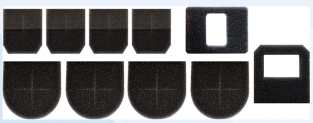

[Si-009] Improvement after side cover damage
An improved product that can be easily installed and used when the side cover lock is broken.

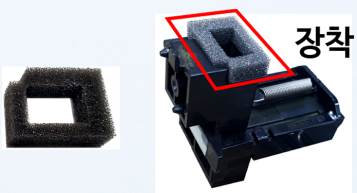

[Se-FU14] Fixture heater roller guide bushing
Bushings mounted on both ends of the heater roller. Made of a rigid material with no play for long-lasting use. High-heat-resistant material used.

[Si-057] Toner front cover sponge
This is a replacement product for when toner powder leaks out due to a worn-out sponge inside the front cover of the copier toner.

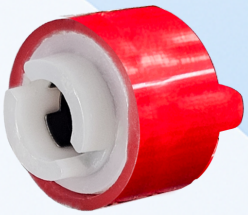

[Si-043] Waste toner container sponge
A product to replace when toner leaks due to a worn-out sponge in the waste toner container.

[Si-045] Sponge connecting tube for waste toner container in transfer belt section
A product to replace when the sponge in the pipe connecting the transfer belt to the waste toner container is worn out and causes toner powder to leak.

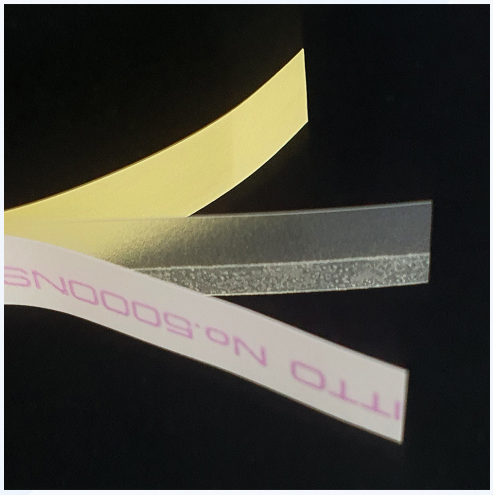

[Si-002] Toner hopper connection gear improvement
Doran Blue improved product, a replacement product for when the toner cartridge cannot be rotated properly

[Sr-C05] Reverse torque limit
The interior is made of a frame to increase durability.

[Sr-C02] One-way torque bearing
Equipped with genuine Origin bearings, this product can be used for a long time after installation.

[Si-023] Color machine drum cleaning seal (drum recovery seal), Mono machine developer seal
Made of a highly durable material that does not stress the drum.
Does not generate static electricity.

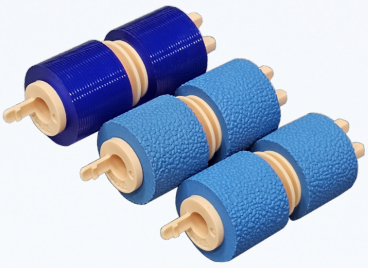

[Sf-001] Fixation finger
A product that can be used for a long time without breaking the ends of existing fingers. An improved version of Doran Blue.

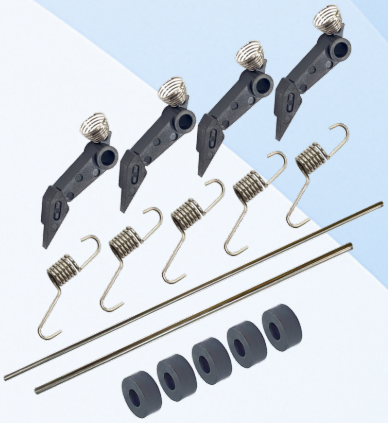

[Sf-007] Fixture badge sensor bar
This product improves the problem of the badge sensor detaching when installed, and has a snap ring for fixation. It is made of heat-resistant material for excellent durability.

Xerox Products

[Xr-C13] Cassette feed roller set (embossing roller)
The first and second rollers are embossed rollers with deep projections, which provide good friction and pull the paper well, and the paper feed roller set consists of a durable reverse roller.

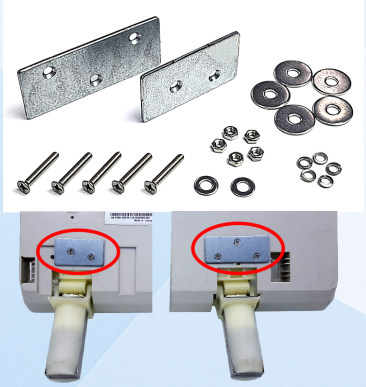

[Xf-005] Fixture heater roller finger
A development component that allows the fixing part to be used even if the existing fixing part is broken, further upgraded with ver. 2 fingers.

[Xr-C04] Cassette feed roller set
The first and second rollers are embossing rollers that pull the paper well to prevent misfeeding, and the reverse roller is durable, making it a set that can be used for a long time.

[Xf-004] Fixture heater roller finger
This product features a modified finger angle to prevent paper jams. The finger tips are made of a sturdy material for long-lasting use.

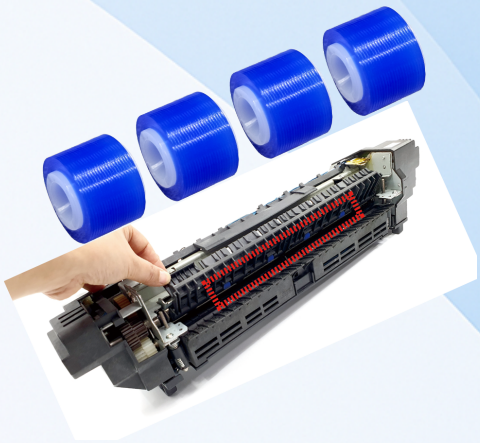

[Xi-001] Counterbalance support shaft improvement
A product that can be easily replaced when the counter balance fixing part that supports the copier RADF is damaged.

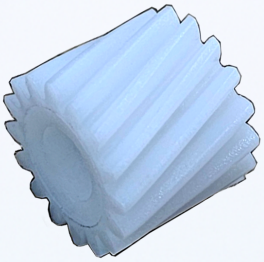

[Xf-001] Fixture badge sensor bar
Made of a durable, heat-resistant material, it's durable. The snap ring has a handle for easy installation.

[Xr-R07] RADF feed roller set
The first and second feed rollers are embossed rollers with good friction to pull the paper well, and the reverse roller is a set of durable urethane rollers.

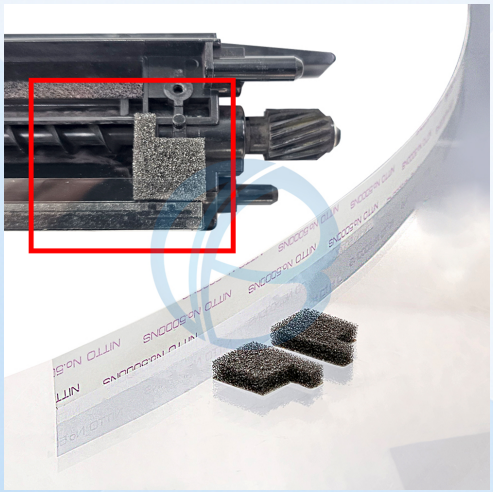

[Xr-C12] Fixture Badge Roller
A roller that is replaced when paper jams occur in the feeder section of the fixing unit. It is durable and can be used for a long time.

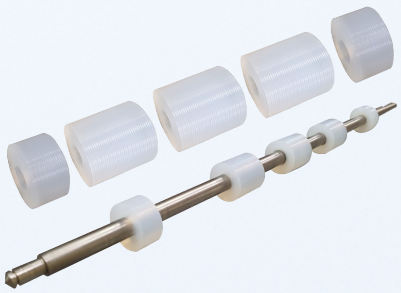

[Xi-003] Register motor main gear
A gear that replaces worn gears in the register motor. Made of a durable material, it is highly durable.

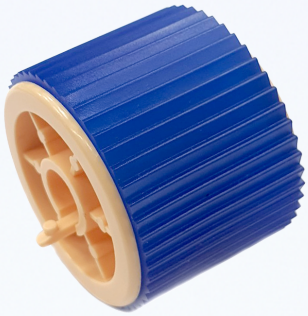

[Xi-006] Main motor gear
A gear that is replaced when the main motor gear of the main body wears out. It is made of a hard material and is very durable.

[Xi-006] Transfer belt braid film/ sponge
A product that replaces old film and sponge on the transfer belt braid.

[Xr-R11] RADF relay roller
A roller that goes in the middle of the ADF and is replaced when worn or jammed. It is a silicone roller with excellent friction and durability.

[Xr-C05] Cassette 1-stage feed roller
A paper feed roller with good friction that pulls paper well and is durable and can be used for a long time.

[Xr-C16] Ice roller (cassette feed roller)
A premium paper feed roller boasting a durability of over 500,000 sheets that maintains excellent friction even in cold winters to pull paper without misfeeding.

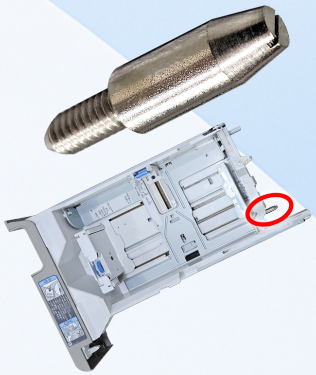

[Xr-C17] Ice Roller (Large Capacity Cassette Feeder) Set
With a paper feed roller that pulls smoothly without freezing or misfeeding even in cold winter, it has a durability of over 500,000 sheets.

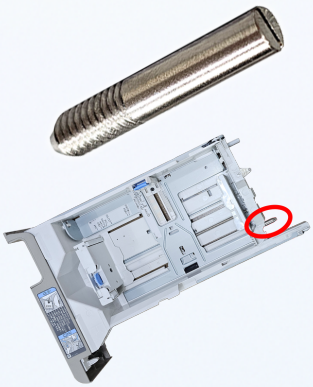

Canon Products

[ci-006] Side cover recognition improvement
A product that can be easily installed to resolve the side cover open error message. It tightly closes the side cover to prevent it from opening. Once installed, the error message is resolved.

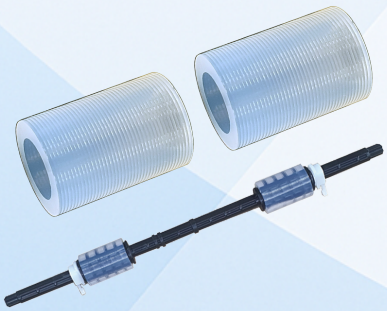

[Ci-004] Improvement after cassette frame damage
If the back of the cassette is damaged, a paper jam may occur. A product to improve this.

[Ci-005] Improved cassette frame damage prevention
A product that prevents the back of the cassette from breaking. It is a product that can be used by simply inserting it.

[Cr-C07] Cassette feed roller set (embossing roller)
The first and second feed rollers are embossed rollers with excellent friction to prevent paper misfeeding, and the reverse roller is durable, making this a set that lasts a long time.

[Cr-C12] Jongpass (vertical) roller
A roller to replace when a jam occurs on the side of the copier.

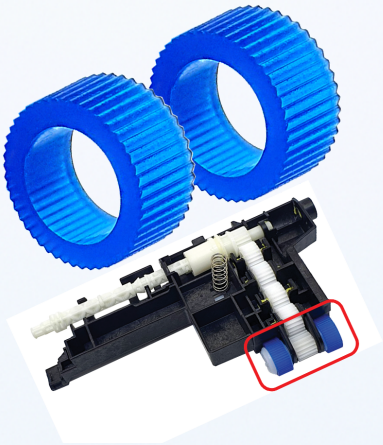

[Cr-C15] Cassette feed roller set
A set of feed rollers that minimize misfeeding by using materials that do not stick to the rollers.

[Cr-R07] RADF feed roller set
A set of feed rollers that minimize misfeeding by using materials that do not stick to the rollers.

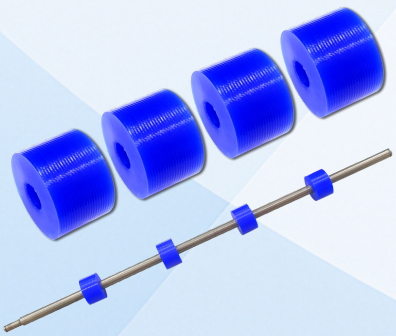

[Ci-003F] Toner Mounting Improvement Set
A product that resolves the issue of the handle not turning smoothly when the toner is installed, made of a durable material for semi-permanent use.

[Cr-C06CX] Cassette feed roller
Pulls paper well with a urethane feed roller with good friction

[Cr-C16] Fixture double-sided transport roller
A roller that is replaced when there is a paper jam in the fixing unit.

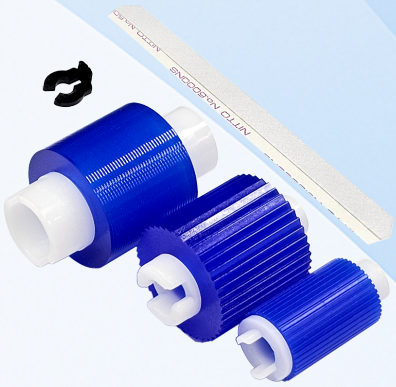

[Cr-C14] Fixture Badge Roller
Roller to be replaced when there is a paper jam at the output side of the fixing unit

[Cr-C13] resist roller
Roller to be replaced when paper jam occurs in the registration section

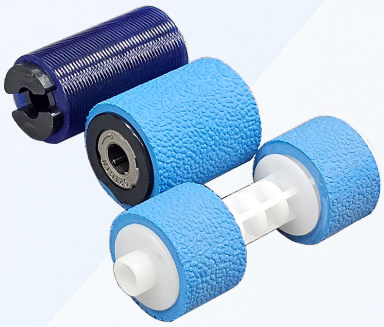

[hr-C22] Cassette feed roller (embossing roller)
A roller with deep embossing protrusions that is excellent for paper handling and pulls paper effectively to minimize misfeeding.

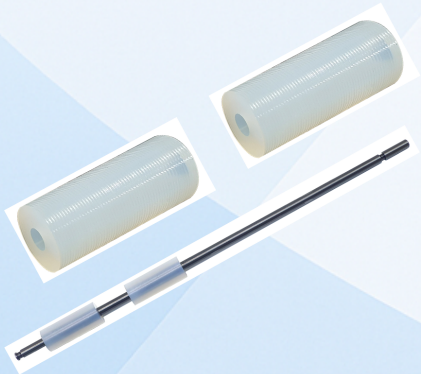

[Cr-C03] Cassette feed roller set
A set of paper feed rollers with good friction, which pulls the paper well, has no misfeeds, and is durable and can be used for a long time.

[Cr-C01] Cassette feed roller set
Feed roller set made of a material with good friction and durability

[Cr-R05] RADF feed roller set
The first and second rollers are embossing rollers that are good for dust care and pull paper well, while the reverse roller is highly durable and allows for long-term use.

[Cr-C10] Jongpass (vertical) roller
Roller to replace when paper jam occurs on the side

[Cr-C17] Ice roller (cassette feed roller)
A paper feed roller that does not freeze even at sub-zero temperatures and maintains its friction. It is a premium paper feed roller with excellent durability and friction.

Kyocera Products

[Kr-C13] Ice roller (cassette feed roller)
A paper feed roller that does not freeze even at sub-zero temperatures and maintains its friction. It is a premium paper feed roller with excellent durability and friction.
